Fordham University, Department of Psychology: Assistant Professor (tenure-track) position in the Psychometrics and Quantitative Psychology Program to begin August 2024.

The [Psychometrics and Quantitative Psychology doctoral program](#) is seeking a candidate with a strong publication record, an established history of external research funding (or clear evidence of potential to secure funding), and teaching experience at the undergraduate and/or graduate level who can contribute to the program's expertise in advanced measurement, evaluation, and statistical skills and the larger psychology department. The ideal candidate will have expertise in one or more of the following areas: integrative data analysis and meta-analysis, cognitive diagnostic modeling, causal inference, Bayesian statistics, social network analysis, missing data analysis, program evaluation, or qualitative and mixed methods in assessment research. Candidates have the opportunity to collaborate with faculty whose research focuses on propensity score analysis, latent variable interaction, missing data analysis, item response theory, psychometric model specification, fit, and interpolation, nonparametric methods, Bayesian statistics, judgement, and decision making, as well as with [faculty from the Applied Developmental and Clinical Psychology programs](#).

The Department of Psychology offers doctoral degrees in Applied Developmental Psychology (ADP), Clinical Psychology, and Psychometric/Quantitative Psychology, along with Master's degrees in Applied Psychological Methods and Clinical Research Methods. The Department is located on both campuses of Fordham University, with the graduate programs located at our Rose Hill campus in the Bronx and undergraduate programs at both the Rose Hill and Lincoln Center (Manhattan) campuses. The primary location for this position will be the Rose Hill campus. Responsibilities include teaching undergraduate and graduate courses, establishing/maintaining a productive independent program of research, and mentoring undergraduate research and graduate students' theses and dissertations. Applicants with a background in psychometrics and quantitative psychology or a related field are encouraged to apply.

Please submit the following: (i) a cover letter addressing how your interests and qualifications align with the position and how you address diversity, equity, and inclusion in your work, (ii) a vita, (iii) a research statement, (iv) a statement of teaching experience and interests, (v) three representative publications, and (vi) names, titles, and contact information for three professional references (Letters of recommendation will be requested at a later date as determined by the search committee). Application materials should be submitted through Interfolio: http://apply.interfolio.com/132468. Expected salary for this position ranges from $94,000-$106,000.

Review of applications will begin **October 30, 2023** and continue until the position is filled. Inquiries should be directed to our department Administrator, Maria Barbieri (barbieri@fordham.edu) or the Search Committee Chair, Dr. Heining Cham (hcham@fordham.edu).

The department has a strong commitment to achieving diversity among faculty and staff.

Fordham is an independent, Catholic University in the Jesuit tradition committed to excellence through diversity. Fordham is an equal opportunity employer, and we especially encourage women, people of color, veterans, and people with disabilities to apply.
